

INSTRUMENT CARE

HINTS & SAFETY

- » All guitars are best kept in their case, away from moisture, humidity and dirt.
- » Always check the guitar case is latched before you pick it up!
- » Don't share your keyboard power cord as it may be the wrong amount of power for another instrument and could damage it.
- » Take batteries out of your keyboard if not using it for a while as they can corrode and damage your keyboard.
- » Clean hands will keep your instruments clean. Don't have food or sticky drinks near your music instruments.
- » Don't leave instruments in a parked car on a hot day. It gets REALLY hot inside a vehicle and this could damage your gear.
- » When travelling with your guitar, loosen the strings to reduce the tension on the guitar neck. This is especially important when flying or on a long road trip.

COMMON TERMS IN THIS VIDEO

HUMIDIFIER

Adds moisture to the air.
Use this in dry weather.

DEHUMIDIFIER

Takes moisture out of the air.
Use this in humid weather.
